Customer Problem :

Credit card applicants want to know their approval chances before applying so they can make informed financial decisions. However, the traditional credit card approval process is slow, complex, and lacks transparency because banks rely on manual verification and strict eligibility rules. This makes applicants feel anxious, uncertain, and frustrated. The Credit Card Approval Prediction System addresses this problem by using Machine Learning to provide instant, accurate, and user-friendly approval predictions based on the applicant's financial and personal information.

I am	Describe customer with 3–4 key characteristics – who are they?	• A credit card applicant. • Age between 21–60, working professional or self-employed. • Earns a regular income and has financial responsibilities. • Uses online services and wants a quick, transparent process.
I'm trying to	List their outcome or "job" the user does – what are they trying to achieve?	• Apply for a credit card. • Know the chances of approval before applying. • Get the approval process done quickly and easily. • Make informed financial decisions.
but	Describe what problems or barriers stand in the way – what hinders them now?	• Complex eligibility criteria are hard to understand. • Long and time-consuming approval process. • Uncertainty about approval due to lack of transparency. • Risk of rejection after applying. • Requires multiple documents and verifications.
because	Enter the "root cause" or why the problems or barrier exists – what needs to be solved?	• Banks use traditional manual assessment and rigid rules. • Lack of instant evaluation using data-driven models. • Limited visibility for applicants about their eligibility. • Absence of user-friendly tools to predict approval chances.
which makes me feel	Describe the emotions from the customer's point of view – how does it impact them emotionally?	• Anxious about rejection and wasting time. • Uncertain and stressed about eligibility. • Frustrated with the lengthy process and paperwork. • Hopeful when they get quick and accurate prediction. • Confident and satisfied when the process is easy and transparent.

Customer Problem Statement

Customer Problem Statement Credit Card Approval Prediction System

 I am Describe customer with 3–4 key characteristics – who are they?	 I'm trying to List the thing they are trying to achieve here	 But Describe the problems or barriers that get in the way here	 Because Describe the reason the problems or barriers exist	 Which makes me feel Describe the emotions the result from experiencing the problems	 Customer Problem Statement Combine into a complete problem statement
PS-1 • A working professional (21–40 years) • Earns a regular income • Financially responsible • Uses digital services	• Know my chances of credit card approval before applying • Get a quick and hassle-free approval process	• The traditional approval process is long and complicated • Eligibility criteria are unclear • I have to submit many documents	• Banks use manual verification and rigid rules • Lack of instant evaluation using data-driven models	• Anxious about rejection • Frustrated due to delays • Uncertain about my eligibility	I am a working professional who wants to know my credit card approval chances and get a quick process, but the traditional system is slow, unclear, and document-heavy because banks use manual verification and rigid rules, which makes me feel anxious and frustrated.
PS-2 • Self-employed individual (25–50 years) • Has irregular income • Wants financial growth • Tech-savvy	• Apply for a credit card confidently • Avoid unnecessary rejections • Plan my expenses and improve financial health	• I am not sure if I meet the bank criteria • Rejection impacts my credit score • It wastes my time and effort	• Lack of transparency in decision making • No easy way to predict approval chances	• Stressed and confused • Worried about my financial future • Disappointed after rejections	I am a self-employed individual who wants to apply confidently and avoid rejections, but I am unsure about eligibility and rejection affects my credit score because there is no easy way to predict approval chances, which makes me stressed and worried.
Overall Customer Problem: Customers want to know their credit card approval chances and get a fast, transparent process, but face long, unclear, and document-heavy procedures due to manual verification and rigid rules, which causes anxiety, stress, and uncertainty.					

Problem Statement (PS)	I am	I'm trying to	But	Because	Which makes me feel
PS-1	A working professional applying for a credit card.	Know whether my credit card application is likely to be approved before submitting it.	The bank approval process is slow, eligibility criteria are difficult to understand , and I don't know whether I qualify.	Banks rely on manual verification, multiple financial checks, and complex approval policies.	Anxious, uncertain, and frustrated because I may waste time and my application could be rejected.
PS-2	A self-employed individual with an irregular income who needs a credit card.	Improve my chances of getting a credit card and make informed financial decisions.	I don't know how factors like income, debt, employment history, and credit score affect my approval.	There is no simple way to predict approval before applying, and the bank does not explain the decision clearly.	Confused, stressed, and worried about rejection and my financial future.
