Developer

Mandakini Gurram
Tester

Steps What does the person (or group) typically experience?	 Enter What do people experience as they begin the process?	→  Provide Information Applicant provides required details	→  Process & Analyze System processes data and runs prediction	→  View Result Prediction result is displayed to user	→  Exit What do people typically experience as the process finishes?	→  Extend What happens after the experience is over?
Interactions What interactions do they have at each step along the way? • People: Who do they talk to? • Places: Where are they? • Things: What digital touchpoints or physical objects do they use?	• Visits website / web app • Reads about the service • Clicks on "Check Approval"	• Fills personal details • Enters financial info • Provides employment and income details • Uploads documents (if required)	• System validates inputs • Fetches credit history • Runs ML model • Evaluates risk & eligibility	• Sees approval probability • Views key factors affecting decision • Checks suggestions to improve chances	• Understands the result • Saves or downloads the result • Satisfied with clarity of prediction	• May apply to bank if confident • Receives tips to improve score • Returns later to re-check
Things (Touchpoints) What digital touchpoints or physical objects would they use?	 Website / Web Application  Mobile / Device	 Input Forms (UI Fields)  Document Upload (Optional)	 Backend Server & Database  ML Model & Prediction Engine	 Results Dashboard  Probability & Insights Visualization	 Download / Save Result  Email Notification (Optional)	 Re-check / New Prediction  Tips & Suggestions via Email
Goals & Motivations At each step, what is a person's primary goal or motivation? ("Help me..." or "Help me avoid...")	Help me understand my chances of credit card approval	Help me provide accurate information quickly and easily	Help me get a reliable prediction based on my data	Help me understand the result and key factors	Help me decide the next best step with confidence	Help me improve my chances for better approval
 Positive Moments What steps does a typical person find enjoyable, productive, fun, motivating, delightful, or exciting?	Easy to access and understand the service	Simple and clear form to provide details	Fast processing and real-time prediction	Clear probability score and factor insights	Satisfied with accurate and helpful result	Helpful tips to improve eligibility
 Negative Moments What steps does a typical person find frustrating, confusing, angering, costly, or time-consuming?	Unclear about how the prediction works	Too many fields or unclear instructions	Long processing time or errors	Result not explained clearly	Confused about what to do next	No follow-up guidance or support
 Areas of Opportunity How might we make each step better? What ideas do we have? What have others suggested?	Improve UI and add how-it-works section	Reduce number of fields, add inline help & validation	Optimize model performance and processing speed	Provide detailed explanations and personalized tips	Add clear next steps and guidance	Send follow-up emails and track progress
