

Acceptance Testing UAT Execution & Report Submission

Date	1 June 2026
Team ID	SWTID-2026-8236
Project Name	Credit Card Approval Prediction System
Maximum Marks	4 Marks

1. Purpose of Document

The purpose of this document is to summarize the User Acceptance Testing (UAT) conducted for the **Credit Card Approval Prediction** system. The testing verifies that the application meets the functional and non-functional requirements and ensures the system accurately predicts credit card approval decisions based on applicant information before final deployment.

2. Defect Analysis

This report shows the number of resolved or closed bugs at each severity level, and how they were resolved

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	0	1	2	1	4
Duplicate	0	0	1	0	1
External	0	0	0	0	0
Fixed	2	3	4	5	14
Not Reproduced	0	0	1	0	1
Skipped	0	0	0	1	1
Won't Fix	0	0	0	0	0
Totals	2	4	8	7	21

3. Test Case Analysis

This report shows the number of test cases that have passed, failed, and untested

Section	Total Cases	Not Tested	Fail	Pass
Dataset Loading	5	0	0	5
Data Preprocessing	6	0	0	6
Feature Engineering	4	0	0	4
Machine Learning Models	8	0	1	7
Prediction Module	5	0	0	5

Flask Web Application	8	0	1	7
User Interface	4	0	0	4
Model Evaluation	3	0	0	3
Security & Input Validation	4	0	0	4
Deployment Testing	3	0	0	3

Overall Test Summary

- **Total Test Cases:** 50
- **Passed:** 48
- **Failed:** 2
- **Not Tested:** 0

4. User Acceptance Result

Status:  PASSED

The Credit Card Approval Prediction system successfully passed User Acceptance Testing. All core functionalities, including applicant data input, preprocessing, prediction generation, model evaluation, and result display, worked as expected. Minor issues identified during testing were fixed before deployment.

5. Conclusion

The User Acceptance Testing confirms that the **Credit Card Approval Prediction** application satisfies the specified project requirements. The system provides accurate prediction results, validates user inputs, offers a responsive web interface, and is ready for deployment and demonstration. The project successfully meets its objective of assisting financial institutions in automating the credit card approval process using machine learning.
